■ current conclusion

分析中

■ My analysis

```
final List<Fragment> fragments = getActivity().getSupportFragmentManager().getFragments();
if (fragments != null) {
    for (Fragment fragment : fragments) {
        fragment.onActivityResult(CONFIG_NETWORK_REQUEST, Activity.RESULT_OK, intent);
    }
}
getActivity().getSupportFragmentManager().popBackStackImmediate();
```

1.如上代码由于fragment.onActivityResult的异步调用，有概率导致还没销毁掉的Fragment再次调用的到自身的onActivityResult，出现递归现象。导致getSupportFragmentManager().popBackStackImmediate()多回退了一级，使页面显示空白。

■ Next action

在onActivityResult调用前，结束掉Fragment
