History

#1 - 2023-05-12 14:11 - CD FW-鲁凯峰

豌豆荚在第一次启动的时候会启动2个Task

先是启动 com.wandoujia.phoenix2/com.pp.assistant.activity.PPMainActivity 然后PPMainActivity会新建一个Task启动PermissionDescActivity

```
RootTask #251: type=standard mode=freeform
isSleeping=false
mBounds=Rect(20, 72 - 543, 1002)
mCreatedByOrganizer=false
mResumedActivity: ActivityRecord{8c7b288 u0 com.wandoujia.phoenix2/com.pp.assistant.permission.privacy.PermissionDescActivity
taskAffinity=10107:com.wandoujia.phoenix2 t251}
* Task{29ca421 #251 type=standard A=10107:com.wandoujia.phoenix2 U=0 visible=true mode=freeform translucent=true sz=1 visible freeform task=true
rootAffinity=10107:com.wandoujia.phoenix2}

RootTask #250: type=standard mode=freeform
isSleeping=false
mBounds=Rect(20, 72 - 543, 1002)
mCreatedByOrganizer=false
mLastPausedActivity: ActivityRecord{14171d1 u0 com.wandoujia.phoenix2/com.pp.assistant.activity.PPMainActivity
taskAffinity=10107:com.wandoujia.phoenix2 t250}
* Task{cec1ca4 #250 type=standard A=10107:com.wandoujia.phoenix2 U=0 visible=true mode=freeform translucent=false sz=1 visible freeform task=false
rootAffinity=10107:com.wandoujia.phoenix2}
```

当我们删除PermissionDescActivity时,由于PPMainActivity没有被finish掉,所以它然后再次显示出来,然后PPMainActivity自己内部的逻辑又会把PermissionDescActivity重新启动起来

```
05-06 20:51:19.259 1060 2186 I ActivityTaskManager: START u0 {cmp=com.wandoujia.phoenix2/com.pp.assistant.permission.privacy.PermissionDescActivity (has extras)} from uid 10107
05-06 20:51:19.260 1060 2186 D lukaifeng: startActivityInner : ActivityRecord{8c7b288 u0 com.wandoujia.phoenix2/com.pp.assistant.permission.privacy.PermissionDescActivity taskAffinity=10107:com.wandoujia.phoenix2
05-06 20:51:19.260 1060 2186 D lukaifeng: mSourceRecord : ActivityRecord{14171d1 u0 com.wandoujia.phoenix2/com.pp.assistant.activity.PPMainActivity taskAffinity=10107:com.wandoujia.phoenix2 t250}
```

初步的想法是在点击关闭小窗的时候 先遍历所有的Task,找到和要删除Task的taskAffinity属性相同的Task,一起删掉
